

Fleece Duster

- (1) 6" x wof fleece
- (1) 4" x 27" fleece
- (1) 7" ribbon
- (1) Yardstick

Center the 4" x 27" piece of fabric on a single thickness of the 6" fleece. Sew down the middle.

Attach the ribbon sewing through both thicknesses of fabric.

Fold the 6" fabric in half and sew 1" from the edges of the 4" piece. This should leave enough fabric in the center to insert the yardstick. In as much as some yardsticks are thicker than others, it would probably be best to measure first.

Clip about every half inch through both pieces of fabric.

This project took about 15 minutes start to finish.
